Project Details

Topic: Evidence protection system Using BlockChain

Duration:6months

The Evidence Protection System using Block chain leverages the immutable and decentralized nature of block chain technology to ensure the integrity and security of digital evidence. This system records evidence metadata on a block chain, providing a tamper-proof audit trail for every interaction. Users can verify the authenticity and history of evidence through cryptographic hashing and timestamps. By decentralizing the data, the system reduces the risk of data manipulation or unauthorized access. Overall, this enhances trust and transparency in the handling and verification of digital evidence.

Strengths

- Hard Working
- Time Punctuality
- Responsibility

Achievements

- I had achieved academic 1st prize in 2nd year JNTUK exams.
- I had achieved 2nd prize in quiz in vkr fest.
- I had achieved gold badge in NPTEL iot course.
